Case Study: Mohegan Sun Casino IP Solutions at Sticks and Stones

Introduction

Mohegan Sun Casino in Connecticut is one of the world's most amazing casinos all in one place. The casinos are perfectly named Casino of the Earth, Casino of the Sky, and Casino of the Wind. Each casino gaming experience is thrilling and action packed with more than 5,000 slot machines, 300 tables, 42 poker tables, and more. There was a lot of excitement for the Sticks and Stones Dipping Grille's grand opening at the Casino of the Sky. While the

experience requires you to play with your food, it also sets the most modern industry ambiance in a fondue style. The restaurant seats 110 people with an open molecular bar seating. Since the new restaurant is inside an existing casino, finding a flexible and integrated IP system was a challenge.

Challenge

The facility includes a large open floor plan, and secluded private corporate event settings. The open bar area requires plenty of security cameras to ensure the safety of employees and guests. Since it's inside a casino, being able to integrate into the established network was a huge challenge. This required LTS technical support's experience, knowledge, and solution for the installer.

CASE STUDY

Solution

Providing a flexible IP solution was implemented. All LTS Platinum IP Cameras are ONVIF Profile S and Profile G compliant, IP66, and UL listed, which was part of the standard requirement. The grille used 21 Platinum Fixed Lens Dome IP Cameras 2.1MP, two Platinum Varifocal Vandal Dome IP Cameras 3.2MP, and one Platinum Enterprise Level 32 Channel NVR 1.5U case with two 4TB Western Digital Purple Surveillance Hard Drives. The casino consists of a complex and well enforced network. Their IT team handled most of the integration process and commented, "Even with the extent of our security firewalls, LTS IP products was easy for us to run to the main router without any complications," Jeremy Winston stated. A separate monitor was added into the control room center where security staff was able to view.

Featured Products:

(CMIP7233-S) Platinum Varifocal Vandal Dome IP Camera 3.2MP

(CMIP7422) Platinum Fixed Lens Dome IP Camera 2.1MP

(LTN8832) Platinum Enterprise Level 32 Channel NVR 1.5U

(DHWD60PURX) Western Digital Purple Surveillance Hard Drive – 6TB

Results

Commercial grade routing can be complex, but LTS was able to help ensure products were easy to integrate. The customer was happy with the results and had no further issues after the system was setup. This solution was able to be reflected on several other similar projects thereafter.
