Case Study: Cameras Adds Protection for Public at Prison

Introduction

The State of Maryland has 27 correctional facilities throughout the state to help protect the public. It's one of the largest departments in the state. Prisoners needed to be well monitored in the yard, as well as inside the building. Through innovation on this project, LTS helped increase security at the prison. The complex has a large area with many different buildings that needed to be covered with HD-TVI solutions. A clear picture was needed during all hours of the day and LTS upgraded the existing security system.

Challenge

Since the facilities needed 24-hour monitoring and an expectation of clear images with a video solution, high definition was a key factor for a successful upgrade. The facility also needed to ensure that video storage was kept for a standard amount of time in order to take any extra measures of evidence recordings when needed.

CASE STUDY

Solution

The complex already had an older analog solution infrastructure setup and LTS wanted to utilize its existing cables. Therefore, it was easy for an installer to replace older analog cameras with HD-TVI solution. We used 15 Platinum HD-TVI Turret Cameras 2.1MP with WDR (CMHT1422W-28), eight Platinum HD-TVI Bullet Cameras 2.1MP (CMHR9422W), and connected them all to a Platinum Enterprise Level 32 Channel HD-TVI DVR 1.5U (LTD8432T-FA). This allowed everything to be easily connected to existing coaxial cables in high definition.

Featured Products:

(CMHT1422W-28) Platinum HD-TVI Turret Camera 2.1MP -WDR

(CMHR9422W) Platinum HD-TVI Bullet Camera 2.1MP

(LTD8432T-FA) Platinum Enterprise Level 32 Channel HD-TVI DVR 1.5U

Results

The job was finished quickly and efficiently. The previous security system was outdated and the upgrade increased the picture quality. The larger 32 channel DVR also helped centralize all the cameras instead of using multiple systems they had before. There were certain cables that could be reused without any distance issues.
