

Supply Chain Management Analyst, Logistics Analyst

City of Industry, CA/ Norcross, GA

LTS is a leader in video surveillance solutions in the category surveillance cameras and network video recorders. LTS is a U.S. based company with well-developed collaboration partners, and acts independently nationwide. Majority of LTS growth is generated by the full video product line; network cameras, NVRs, high definition analog, HDTVI cameras and DVRs, PTZ, accessories, and free application software.

We pride ourselves in offering a structure and collaborative working environment where team members can contribute to all aspects of the business.

We are always interested in hearing from good talent with proven track record. Come join us and grow with a company that stays ahead. Interested applicants please submit resumes to HR@LTSecurityinc.com or visit our website at <http://www.LTSecurityinc.com>.

Primary Responsibilities:

To analyze the procurement needs and optimize the inventory control, the company is in great need of a professional service to prepare the equipment and material procurement planning and analysis. The candidate will perform these job duties:

- Develop metrics for processes to be used to understand performance baselines, trends and root cause analysis for defect reduction and process efficiency;
- Analyze and document supply chain specific reporting and analytical requirements utilizing standard methodologies and processes;
- Perform standard and ad-hoc reporting and analyses to review historical information and identify opportunities to influence supply chain process improvement, procurement tradeoffs, transportation service adjustments, etc.;
- Work with sales to develop robust sales and financial forecasts as well as work with suppliers to reduce inventories and delivery issues to enhance value and service;
- Work with suppliers to reduce inventories and delivery issues to enhance value and service;
- Track shipments, analyze demand and capacity reports for operations planning, and execute monthly inventory plan to optimize earnings and reach business goals;
- Review quarterly reports from the inventory supervisor, providing comments, verifying technical data, specifications, and procedures applied, while monitoring key performance indicators and analyzing performance data to increase effectiveness of supply chain initiative;
- Evaluate budget, profit and cost efficiencies in various areas of the company, comparing company's financial reports with those of previous years;

- Confer with suppliers to discuss performance metrics, provide performance feedback, or discuss production forecasts or changes;
- Deliver timely revenue reporting/forecast to senior level management as line of business and product mix, including ROI/IRR analysis, sensitivity analysis, scenario analysis, and various analysis;
- Engage in ongoing cost reduction analysis in all areas of the company to maximize the operational profit;
- Provide advice and technical assistance with cost analysis, fiscal allocation, and budget preparation.
- Work with Chinese based manufacturing vendors and U.S. based clients to develop production and design standards.
- Estimate production costs, cost saving methods, and provide quotations and BOM (Bill of Material).
- Develop master schedule for the establishment of sequence and lead time of orders according to customer orders and sales forecast.
- Review Chinese manufacturer production schedules, engineering specifications, orders, and related information to obtain knowledge of manufacturing methods, procedures, and activities.
- Confer with clients, vendors, staff, and management personnel regarding purchases, product and production specifications, manufacturing capabilities, or project status.
- Coordinate activities in sourcing parts & modules.
- Evaluate precision and accuracy of production and testing equipment and engineering drawings to formulate corrective action plan.
- Develop international master schedule plan based on production forecasts, material substitutions, storage and handling facilities, and maintenance requirements.

Qualifications:

- Minimum Bachelor's Degree in Supply Chain Management, Business Administration or related field.
- Proficient with computers and familiar with windows based applications.
- Bilingual in English and Chinese Preferred
